STOCKS MORE ACTIVE AND PRICES ADVANCE

After several pauses session closes with material gains—Oils are under pressure.

NEW YORK, May 13.—Frequent pauses marked the session of the stock exchange today. Although trading was again active and broad, price changes were mainly upward. The market opened on a very firm note and continued to the final hour, when the usual fluctuations were made. Higher quotations were made in stocks, copper and allied silver. The chief elements of strength were the oil elements, which advanced 2 to 2 1/2 points, and a reported advance in some of the steel products following the failure of the government to stabilize the plan. Numerous stocks advanced 1 to 2 points with secondary or minor issues, probably because of the betterment in the outlook for United States Steel. The independent group rose from 2 1/2 to 3 1/2 points. American Locomotives and the Baldwin Air Brake were the outstanding features at 2 to 2 1/2 points.

Under pressure of the time, but Mexican shares turned the tide, rising 4 to 5 points. Texas company recovering a report from General Motors also advanced 2 to 2 1/2 points. Shipping strengthened, but that division as a whole was irregular. Leather, tobacco, utility and food and fertilizer shares were mostly higher. Local fractions were the exception. Liberty issues also showing some weakness. Old United States copper 4 1/2 rose 1-4 cent on call.
